

Green Initiative Program

For 2023 and beyond the Canadian Association of Rallysport (CARS) is introducing a Green Initiative program for the National rallies. CARS is asking that events have a green initiative in their event, at a minimum of \$750, if the event does not do this then CARS will purchase/donate this amount of the National event permit towards an initiative of their choice.

Carbon offsets, can be more than tree planting. i.e., infrastructure projects. The Suzuki Foundation has ratings for the various groups and their projects. The board feels the green initiative might become necessary to continue to get road permissions, sponsorships and community support.

The National event permit is \$1500 and can be lowered to \$750 with proof of an approved initiative. The initiative can be brought forward through the National Series Manager if there is a question of compliance.
