

Competitor Bulletin 3

Wednesday Dec 5, 2018

3-1 Routebook additions

The following elements should be added to the routebook for shakedown.

1.65 | !!! Road Narrows !!!

4.01 ! Rough to stop

3-2 Recce Schedule

A revised recce schedule is attached to this bulletin.

Note: cars will be released on 30 second intervals and the windows and you MUST be on time for stage openings. You should be able to complete recce by 6:30 pm if you can keep a 32 km/h average on stage, but there will not be a lot of time for breaks during the day. Be prepared for a long day in motion.

It is important to note that we are sharing the stages with active logging operations, particularly the Gem-Falcon stage. It is **imperative** that teams respect the recce speed limits and always be prepared for oncoming traffic.

There will be two-way Recce traffic on the Gem-Falcon and Falcon Gem stages.

3-3 Technical Inspection

With the change to the recce schedule, all tech inspection times have been pushed back by 1.5 hours.

3-4 Tech items at Registration

To help make Technical Inspection run quicker and smoother, teams are requested to bring their Helmets, H&N devices, and suits with them to Registration, and to see Matt Pullen to have those items pre-checked.

3-5 RPAC Toques

Many of you are aware that The Rally Promoter Association of Canada is a group that has been formed to look at bringing a WRC event to Canada on the behalf of CARS. To help fundraise for the project, Toques will be available at registration for a minimum donation of \$35.

3-6 RallySafe Fitting Kits

RallyWest has a small number of permanent fitting kits available for sale at this event. See Keith Morison at Registration for further details.
